**Subject:** Agenda item

Please consider an additional agenda item for the March 29th TFD meeting:

Discussion on planning for the construction of a new Tubac Fire Station #1 and Possible Action for preliminary work by WSM architects based on the initial contract between TFD and WSM Architects.

Rational: The TFD Board in conjunction with senior TFD personnel should discuss plans, concerns and issues regarding the proposed building of a new Tubac Fire Station #1. Based on how the discussion progresses, there may be specific planning information WSM Architects need to provide the Board. There also may be information the Board needs to be made aware of concerning discussion between TFD senior staff with WSM Architects as well as with the Department of Agriculture regarding any recent requirements on the grant process.
