

Board Action Request

TO: Tubac Fire Board Members
FROM: DC Genaro Rivera
SUBJECT: Discussion and Possible Action to Replace Non-Functioning AC unit at Station #2
DATE: 2/22/2023

Background: Station #2 was originally built in 1994. This year one air conditioning unit developed some operational issues including a freon leak and a very noisy compressor. We had three AC service companies look at it with the same recommendation, that the unit should be replaced. The unit has since then has quit producing cool air.

Staff was able to get three quotes from local vendors (attached). Bustamante Refrigeration was the low responsive bid.

Fiscal Impact: \$7,300. This expense was not budgeted for this year.

Alternate Option: None identified.

Staff Recommendation: Award replacement of AC unit for Station 2 to Bustamante Refrigeration at a cost of \$7,300. Bustamante currently does our AC service at our stations.

Proposed Motion: Madame Chair, I move to award replacement of the AC unit at Station 2 to Bustamante Refrigeration at a cost not to exceed \$7,300.

Attachments: Vendors quotes from Bustamante, Cactus, and Oasis.
