Subject: FW: Kudos for Tubac

Good afternoon,

I received this from our stroke program manager today. TFD did a great job of identifying LVO and sending the patient to the appropriate facility. Please thank those involved for doing a great job of patient care and documentation.

Check out the clot.... Wow.

Happy holidays and merry Christmas to Tubac Fire.

CM

Hi Carl

Can you please pass on a huge kudos to Tubac Fire.

This pt was flown in last night with a suspected stroke/large vessel occlusion and went for a successful thrombectomy.

Bringing her directly to a Comprehensive Stroke Center was the absolute right thing to do!! NIHSS on arrival was 7, this morning her NIHSS is 0!!!

Please thank them on our behalf and share that she is doing great!

Merry Christmas Carl 😊.
